Experienced landscape supervisor with 10+ years of a successful track record outdoor management. Known for innovation, self-drive, and project leadership. Seeking roles as a junior software developer to work in collaborative environments where innovation and creativity are valued.

TECHNICAL SKILLS

- Object-Oriented Programming: Java
- Web Application Development: HTML, CSS, JavaScript, Spring Boot, Vue.js
- Database Programming: JDBC, Table Design, SQL, PostgreSQL, E/R diagrams
- Development tools and techniques: Agile, Unit Testing (JUnit), Integration Testing, Git, IntelliJ

TECHNICAL EXPERIENCE

- **My Foodie Friend** - My Foodie Friend - Full stack meal planning application built with a team using Agile product management, Java OOP fundamentals, PostgreSQL, and Vue.js. Meal planning application that allows users to view various recipes by category while registered users can favorite recipes, alter recipes, and create a grocery list
- **TEnmo Money Exchange Application** - Worked with another developer to design an object-oriented money exchange program using Java (IntelliJ), Spring Boot and PostgreSQL (pgAdmin). Keeps track of user account balances, can deposit more funds, accepts money transfers and request between users in the database, and logs all transactions
- **Virtual Vending Machine Application** – Worked with another developer to design an object-oriented vending machine program using Java (IntelliJ). Accepts user input for depositing money, calculates change, and actively tracks and displays inventory
